## A Word About Mail Orders

Mail orders from this advertisement will be filled the same day as received. Our expert shoppers will select from the assortments offered as carefully as though they were buying for themselves. As these shoppers know the stocks so well, the chances are that they can select even better than you could yourself.

Cash must accompany the order in each case—owing to the low prices we must charge for transportation.

## GERMAN SYSTEM HARD TO PROBE

Men Who Finance and Direct Conspiracy to Destroy Munitions Betray No Secrets.

New York, April 15.—Federal investigators had made little progress in their attempts to discover the identity of the men who financed and directed the alleged fire bomb conspiracy to destroy munitions ships. Agents of the department of justice said today that the system of the German agents alleged to be involved in destructive activities in this country, is so perfect that some of the ring leaders are disclosed.

"Those who have a comprehensive knowledge of such an undertaking are high class men, who will neither confess, nor betray a single secret," said Captain Wm. M. Coffey of the department. "The men who have confessed are not entrusted with important secrets. For that reason the six confessions we have obtained are of little value in going higher up."

The whereabouts of Dr. Walter T. Scheele, the chemist who conducted the fertilizer factory in Hoboken where it is charged the bombs were filled with explosives, has not been ascertained by the authorities. His wife, who lives in Bogota, N. J., said he had gone on a two weeks trip into the mining regions of Pennsylvania. Federal investigators are examining the banking accounts of Dr. Scheele, in the hope of discovering the source whence he obtained the \$10,000 check to finance the operations of the factory.

## MANY THINGS ARE LOST AT SCHOOL

The city board of education at its regular meeting last night, was urged, in a communication from the Women's Federated clubs of Ogden, to have individual lockers installed in the Ogden High school. The communication was signed by Mrs. S. S. Smith, Mrs. E. L. Howes and Mrs. A. B. Corey, and in it the ladies stated that much loss and annoyance had been caused the students through the present system of caring for their wraps and books. The question was referred to the committee of the whole.

An offer of co-operation and aid in furthering the home gardens movement, from the Utah Agricultural college, was received in the form of a letter and referred to President W. H. Williams. The offer was for literature and other assistance to the students in their out-of-school hours' work.

A few routine matters were considered and the board adjourned to meet again next Tuesday evening.

## FRED FULTON FINE TYPE OF ATHLETE

New York, April 15.—Fred Fulton of Rochester, Minn., who has begun training here at the Pioneer Sporting Club, is impressing New York favorably. The 235 pound giant is liked personally, and is gaining many adherents who believe in his athletic ability.

Six feet five in his stocking feet and apparently not carrying any excess baggage, the newest claimant of the heavyweight title has all the earmarks of being "the goods," those who journey up to the Pioneer testify.

A big, raw-boned fellow, who has never done anything else but work hard since he was eleven years of age, Fulton has every type of the right sort of athlete "standing out" on him, and the consensus is that he fills the bill and answers all the specifications which have been claimed for him.

He is the type of athlete who, while conscious of his ability, is not possessed of the "big head," and prefers that those who are prone to criticize will await seeing him in action before passing judgment on his ability.

On April 18 he will enter upon his twenty-sixth year, and while it does not show on any of the statistics in relation to the battles of the champion, "Jesse" Willard, it is recorded that Fulton knocked him down with a straight right to the jaw in a three round exhibition May 14, a year ago.

Fulton has a reach of 83 1/2 inches and a chest measurement of 47 inches in repose. Of thirty-eight battles, he has the unsurpassed mark of thirty-four knock-outs to his credit.
